**MOUNTING BRACKET INSTALL INSTRUCTION**

# HARNES INSTALL INSTRUCTION

1. Determine suitable mounting locations to install the LED light bars, wiring harness and switch panel. Once all mounting locations are confirmed, connect the wires as shown above. Proper insulation at connections is required.
2. Connect positive and negative wire properly. Press the switch buttons to test if each mode is functioning properly.
3. Adjust the light to the desired angle and then secure by tightening all mounting screws.
4. There are 3 flash patterns available: Triple, Double Quick and Double Slow. You can switch to a different strobe pattern by turning the strobe switch on and off with an interval of at least 2 seconds.
